

VOTEX[®] SUPER KOMBI

THE ROBUST ROTARY MOWER FOR MODERN FRUIT FARMING

With the Super Kombi, Votex has developed a rotary mower which, when provided with a mowing-spraying frame, makes it possible to mow and spray in one operation. The Super Kombi is a compact rotary mower featuring a low construction, a very strong frame and three triangularly arranged cutting rotors resting on vertically adjustable supporting dishes. This construction guarantees excellent adaptation to the ground and a very stable movement even at high speeds.

The machine is particularly suitable to be used in combination with an orchard sprayer. The disengageable gearbox enables spraying without mowing. It can also be used to stop the mower when filling the sprayer.

- Mowing-spraying frame construction is such that the weight of the sprayer is carried by the tractor
- Sprayer coupled to the mower follows the track of the tractor
- Very strong gearbox with spiral bevel gears
- Disengageable gearbox enables spraying without mowing.
- Heavy-duty transmission V-belts without tensioning pulleys,
- Easy access to V-belts

- Supporting discs under blades
- Cutting height adjustable between 30 and 80mm
- Excellent adaptation to the ground
- Easy turning; no damage to the grass
- Bearing houses with adjustable conical bearings
- Back roller available
- Front trailed execution available

Technical data:

Type:	180	200	215	230
cutting width in cm.	174	201	213	231
Overall width in cm.	190	210	225	245
Overall length in cm.	107	132	132	142
Overall height in cm.	93	93	93	93
Cutting height in cm	3-8	3-8	3-8	3-8
Weight in kg	270	295	320	345
Weight in mowing /spraying execution	305	330	355	385
Mounting category	1	1	1	1
Mounting	Front/rear	Front/rear	Front/rear	Front/rear
